

Professional Summary

Data Science undergraduate with hands-on experience in Machine Learning, Deep Learning, and LLM evaluation. Demonstrated success in building production-ready AI models, securing top rankings in national hackathons (Amazon ML Challenge), and selection for Amazon ML Summer School 2026. Proficient in Python, TensorFlow, PyTorch, and Generative AI frameworks.

Education

2023–2027 **B.Tech in Computer Science & Engineering (Data Science)**, Manipal University Jaipur, Jaipur, India

- CGPA: 8.58 / 10.0 | **Relevant Coursework:** Machine Learning, Deep Learning, NLP, Data Structures & Algorithms, DBMS.

Professional Experience

Present **AI Freelancer – LLM Evaluation & Machine Learning**, Soul AI (via Deacon AI), Remote

- Conducted advanced qualitative analysis and model evaluations to benchmark and score large language model outputs for reasoning accuracy.
- Audited machine learning and deep learning code generated by LLMs for execution efficiency, correctness, and engineering best practices.
- Engineered structured prompt workflows and applied Reinforcement Learning from Human Feedback (RLHF) to optimize model alignment.

Projects

2025 **AI Image Detector (GitHub)**, VISTA'25 Hackathon Top 10

- Tech Stack:** Python, TensorFlow, Keras, EfficientNetB0, OpenCV, Scikit-learn
- Engineered a deep learning classifier to distinguish authentic images from AI-generated deepfakes, securing a Top 10 national rank.
- Leveraged transfer learning via EfficientNetB0 for high-precision feature extraction, achieving a validation accuracy of 96% and LogLoss of 0.12.

2025 **AgriFutura AI Diagnosis (GitHub)**, Smart Agriculture Platform

- Tech Stack:** Python, TensorFlow, CNN, OpenCV, Streamlit
- Developed an end-to-end computer vision platform providing real-time crop disease diagnosis from agricultural leaf images.
- Built a custom CNN architecture integrated with an automated OpenCV preprocessing pipeline to normalize lighting and contrast.

2024 **Automated Text Condenser (GitHub)**, NLP Analytics Tool

- Tech Stack:** Python, NLTK, Scikit-learn, Flask
- Designed an automated natural language processing tool to summarize extensive research documents into concise insights.
- Implemented extractive summarization algorithms leveraging TF-IDF scoring and advanced sentence ranking methodologies.

Technical Skills

Programming Python, SQL (MySQL), C/C++, JavaScript

Machine Learning Supervised/Unsupervised Learning, Deep Learning, CNNs, Transfer Learning, BERT Fine-Tuning

GenAI & LLMs Prompt Engineering, LLM Evaluation, RLHF, Alignment Scoring, Transformers, LangChain

Tools & Frameworks TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Git, Jupyter, Streamlit

Achievements & Honors

2026 Admitted to the highly selective **Amazon ML Summer School 2026**.

2025 Authored and published a **Patent Research Paper** accepted in an international conference.

2025 Secured position as a **Top Finalist** in the competitive **Amazon ML Challenge Hackathon 2025**.
